DARKOO OPTICS CO., LTD.

PART 1

—— 企业概况 ——

Company profile

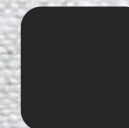

DARKOO Optical Co., Ltd. is a professional engaged in the development, processing and production of spherical, aspheric optical lens, LED lens, optical plastic parts, optical mold, precision plastic mold. Existing equipment: 80 T ~ 160T precision injection molding machine more than 10 Taiwan. High-speed ultra-precision CNC mold processing machine 2, precision grinding machine, milling machine, drilling machine, polishing machine, equipped with: integrating ball, interferometer, projector and other optical detection equipment. Hired a number of years of development and design experience in the optical engineer 1, more than 10 years experience in optical mold processing technician 3, and more than optical products injection experience, quality control personnel.

Products are mainly exported, Europe and the United States, Japan, Korea, Taiwan, Hong Kong etc. and so dozens of countries and regions.

We have developed in the field of lighting, aspheric optical lens applications and LED lens applications in the field of lighting hundreds of single head, more head, concave, convex, stripes, cross, honeycomb, different angles of the LED optical lens and variety Supporting support, the price is reasonable, excellent quality, the production of raw materials used in Japan Mitsubishi original into Mouth optical grade PMMA, to ensure that the product of the optical penetration of more than 93% .
